It is alleged that upon the occasion of a recent visit to the factory, Dr. Woodward found as many as half a dozen hogs lying exposed to the sun and air, and the stench emitted was almost unbearable.

It is not stated just what action will be taken, but it is customary in such cases to notify the proprietor of the charges made, and to require abatement of the nuisance within a given time. In case of non-compliance, a warrant is procured, and the issue is joined before the police court.

While relating his experiences in Dixie Uncle Joe became drowsy, and apparently fell into a deep slumber, still sitting in his old arm chair. One by one the family dropped off to bed, but the man did not awaken. It was 4:40 o'clock this morning when a member of the household got out of bed and commenced preparations for his day's duties. He saw Uncle Joe still sitting in the arm-chair, apparently in a deep siumber, and tried to arouse him. The old man's flesh was cold. He had quietly passed away, with the Southland reminiscences still on his lips, and had sat stiff and stark in death all night long in the old arm-chair. Coroner Hammett was notified today.

Report That McKinley Managers Favor Indiana Money Plank the Cause. New York, June 5.—As the morning wore along a more confident tone prevailed in stock circles, and on spirited dealings prices advanced sharply. The underlying cause for the improvement in the market cause for the improvement in the market was the announcement that the McKinley managers favor the Indiana currency plank and that it may be adopted at St. Louis. The plank favors the use of silver as currency as long as it can be maintained at par with gold, but is against free coinage of silver at 16 to 1. This plan is generally acceptable to New York hankers, although some of them expect that the St. Louis convention may even strike out the 16 to 1 clause. There is also a disposition among the traders to discount the results of the St. Louis convention, the idea being that the Republican platform will be strongly for a sound currency platform.
